# Introducing Iván Chocrón

---

Iván Chocrón is a coach, speaker, educator & retreat facilitator bridging science and spirit to make healing accessible to the modern western mind. Born and raised in Argentina, he studied engineering at the National Technological University of Buenos Aires and taught mathematics and chemistry. Recognizing his own need for healing, he began researching western psychology, eastern philosophy, meditation, and a wide range of inner-work modalities.

Studying under both modern practitioners and traditional teachers, he developed his own methodology, which he calls Inner Cartography, a synthesis of ancient traditions and modern psychology. His passion for a rational, grounded approach has made deep healing accessible to people of all faiths. He believes the kind of growth often described in mystical terms can be made approachable through a relatable, science-minded facilitation style.

No matter where people are in their healing process or what belief system they follow, human connection paired with modern integration practices sets the stage for real change.

Over more than a decade, this philosophy has built a global community of over ten thousand people across more than twenty countries. Outside of his work, Iván is deeply invested in his own practice. He speaks five languages and competes in Ironman triathlons. His first book is finished and in editing, expected 2026.

“Healing work is the most important thing anyone can do for themselves and the world around them.” *Iván Chocrón*

“ Healing work allows you to become friends with your past so that you can welcome what’s next with ease. It is the most important thing anyone can do for themselves and the world around them. ”

*Irán Chocrón*

## Science & Spirit

Bridging the worlds of science & spirit creates accessible healing through human connection and a scientific knowledge of ancestral medicine.

## Real Healing is Real

This might sound obvious, but is it? If we truly knew that we could heal, why would we decide to numb our pain? True healing is possible and there are accessible ways to get there.

## Relatability

Meeting people where they are at with a rational and grounded approach suitable for the modern western mind is key for everyone to feel that healing work is also meant for them.

## Inner Gift

Every person has unique gifts, but few are aware of them until they heal their wounds. As people walk the path of healing they begin discovering and embodying their gifts, which brings a great sense of purpose and enthusiasm for life.
